

Besides running out of half and half on a regular bases ice is not filled and it is very dirty.

Last week a wonderful milk dispenser arrived like the one in B-1.

It has been less than a week and it was empty of half and half and none to refill it with.

I managed food retail for most of my life before joining the federal government.

This stuff is not rocket science.

On a positive note B-1 is always clean and stocked wow how do they do it?

The main reason I go to the 2nd floor as do most people I know has been because the wonderful and very hard working (b)(6).

Today is her last day, she is going to building 35 they are so lucky to have her.

All that being said I will be now going to B-1 like so many others I know.

From what I can see the 2nd floor cafeteria is lacking good management that is if they are even there.

Thanks so much!!!
